KNOWLEDGE BASE

- Microsoft Stack(C#, .NET, EF, Dapper)
- Rest, Restful Services
- MS-SQL, PostgreSql, Oracle
- Microservices, Event Driven Arc. Monolith, Modular Monolith, CQRS
- DDD, TDD, Unit test, Nunit, Moq, Ocelot etc.
- Clean Code, Clean Arch.
- RabbitMQ, Hangfire, Redis
- Identity Server, Oauth2, JWT
- Javascript(React)
- Agile, Scrum, Jira
- Monitoring, Grafana, Prometheus

EDUCATION

- Uskudar University, Master of Computer Engineering (w/o thesis)
- Anadolu University, MIS
- Balıkesir University, Computer Programming
- Tuzla Technical High School, Computer Programming

PROFILE

I'm a software developer with about 7 years of experience in backend development. I have contributed to various projects in collaboration with cross-functional teams. I view challenges as opportunities for growth and strongly believe that prioritizing customer needs is essential for delivering impactful solutions.

EXPERIENCE

Senior Backend Developer

Boyner A.S - May 2025 to Present

Senior Backend Developer

Borda Technology - April 2023 to May 2025

Developed a hospital asset management product with using clean arch., microservices with event based communication.

- Unit testing on every microservices up to %90 coverage.
- Refactoring the app microservices to modular-monolith.
- Developing a workflow, actions mechanism to extend user functionality (similar to N8N)

Senior Backend Developer

HangiKredi - November 2021 to April 2023

Added features like financial assistance and budget management to the app that compares credit products.

- Refactoring the current custom authentication system to Identity Server.
- Added a new gateway using Ocelot, and also a BFF layer added to the app that serves 10+ microservices.

Backend Developer

Acıbadem Technology November 2020 to November 2021

Playing a significant role in the increasing performance of some modules in the app like Stock Counting, and Stock Transaction Management at Material Management Team.

- Leading the junior developers at learning dotnet & ef core
- Helping teammates about understanding DDD & Modular-Monolith arch.

Full-Stack Developer

PAK Group July 2018 to November 2020

Working with co-workers in different departments and helping them digitalize their work developing fast-paced, various applications.

- Creating an architecture purposed fast-paced development.
- Developing a Dynamic Form Builder tool with no code using React.
